

YOUNG PEOPLE WITH VALUES

CREATING 'YOUNG PEOPLE WITH VALUE' MODEL AT EUROPEAN LEVEL

International Workshop

Even though it has been a month ago since the International Workshop, it feels like it was yesterday. Valuable discussions and the sharing of experiences among international peers and stakeholders is not something that happens every day. Over 40 participants from Brazil, Spain, Norway, the Netherlands, Portugal, Romania, Sweden and Italy joined the International Workshop and all kinds of profiles were represented.

From people working at a chamber of commerce to people working at schools, from different representatives of multiple fields of municipalities (such as an international department and youth departments) to NGO representatives and many more.

The International Workshop was organised for these stakeholders to share and exchange their experiences, and see how other countries face the challenges, how they found solutions and what their perspectives on working with NEETS are. This workshop proved to be very successful. It was not only very successful regarding the representation, but it also was very interesting to all attendees. The engaging discussion provided good practices and experiences from all countries and organisations. Moreover, it allowed to dive into the topic a little deeper during dinner.

Besides the International Workshop, we have visited some classes of youngsters and their tutors who are working under the YoPeVa application. During this visit the youngsters explained what they are doing during their YoPeVa adventure. They also showed what this programme means to them and their families and what aspirations they have for the future.

Cristina Rodríguez planted a seed:

YoPeVa is just a beginning, we should look for more ways to work together on the topic of the inclusion of NEETs in work and/or school life.

We ended the day with a visit to the Sustainable Food Exhibition at the Fundesplai premises. This was a very impressive exhibition with informative visualisations of the impact of the food choices we tend to make. You can find more information about this exhibition here: https://albergueesplaibarcelona.com/en/blog-en/hostel-news/secrets-sustainable-healthy-food/ and here (Spanish only): https://menjaactuaimpacta.org/es/descubre-la-exposicion/

YoPeVa Entrepreneur

One way of continuing the journey of inclusion of NEETs in work and school life, is with the project YoPeVa Entrepreneur. Within this project we will build on to the success and potential of YoPeVa, with an entrepreneurial dimension. By creating a model to work with Young People's ability to start-up a new business, YoPeVa Entrepreneur wants to promote their self-confidence, knowledge and skills to implement and undertake entrepreneurial initiatives. Do you want more information on YoPeVa Entrepreneur, follow the socials and keep a close eye on the YoPeVa Entrepreneur page of the YoPeVa website.
